

ZERO ONE PORTFOLIO

ZERO RISK, 1% MONTHLY PROFIT

“zero risk” is a way of saying “the lowest possible risk”, there is no way to have a real zero risk on anything in the world!!

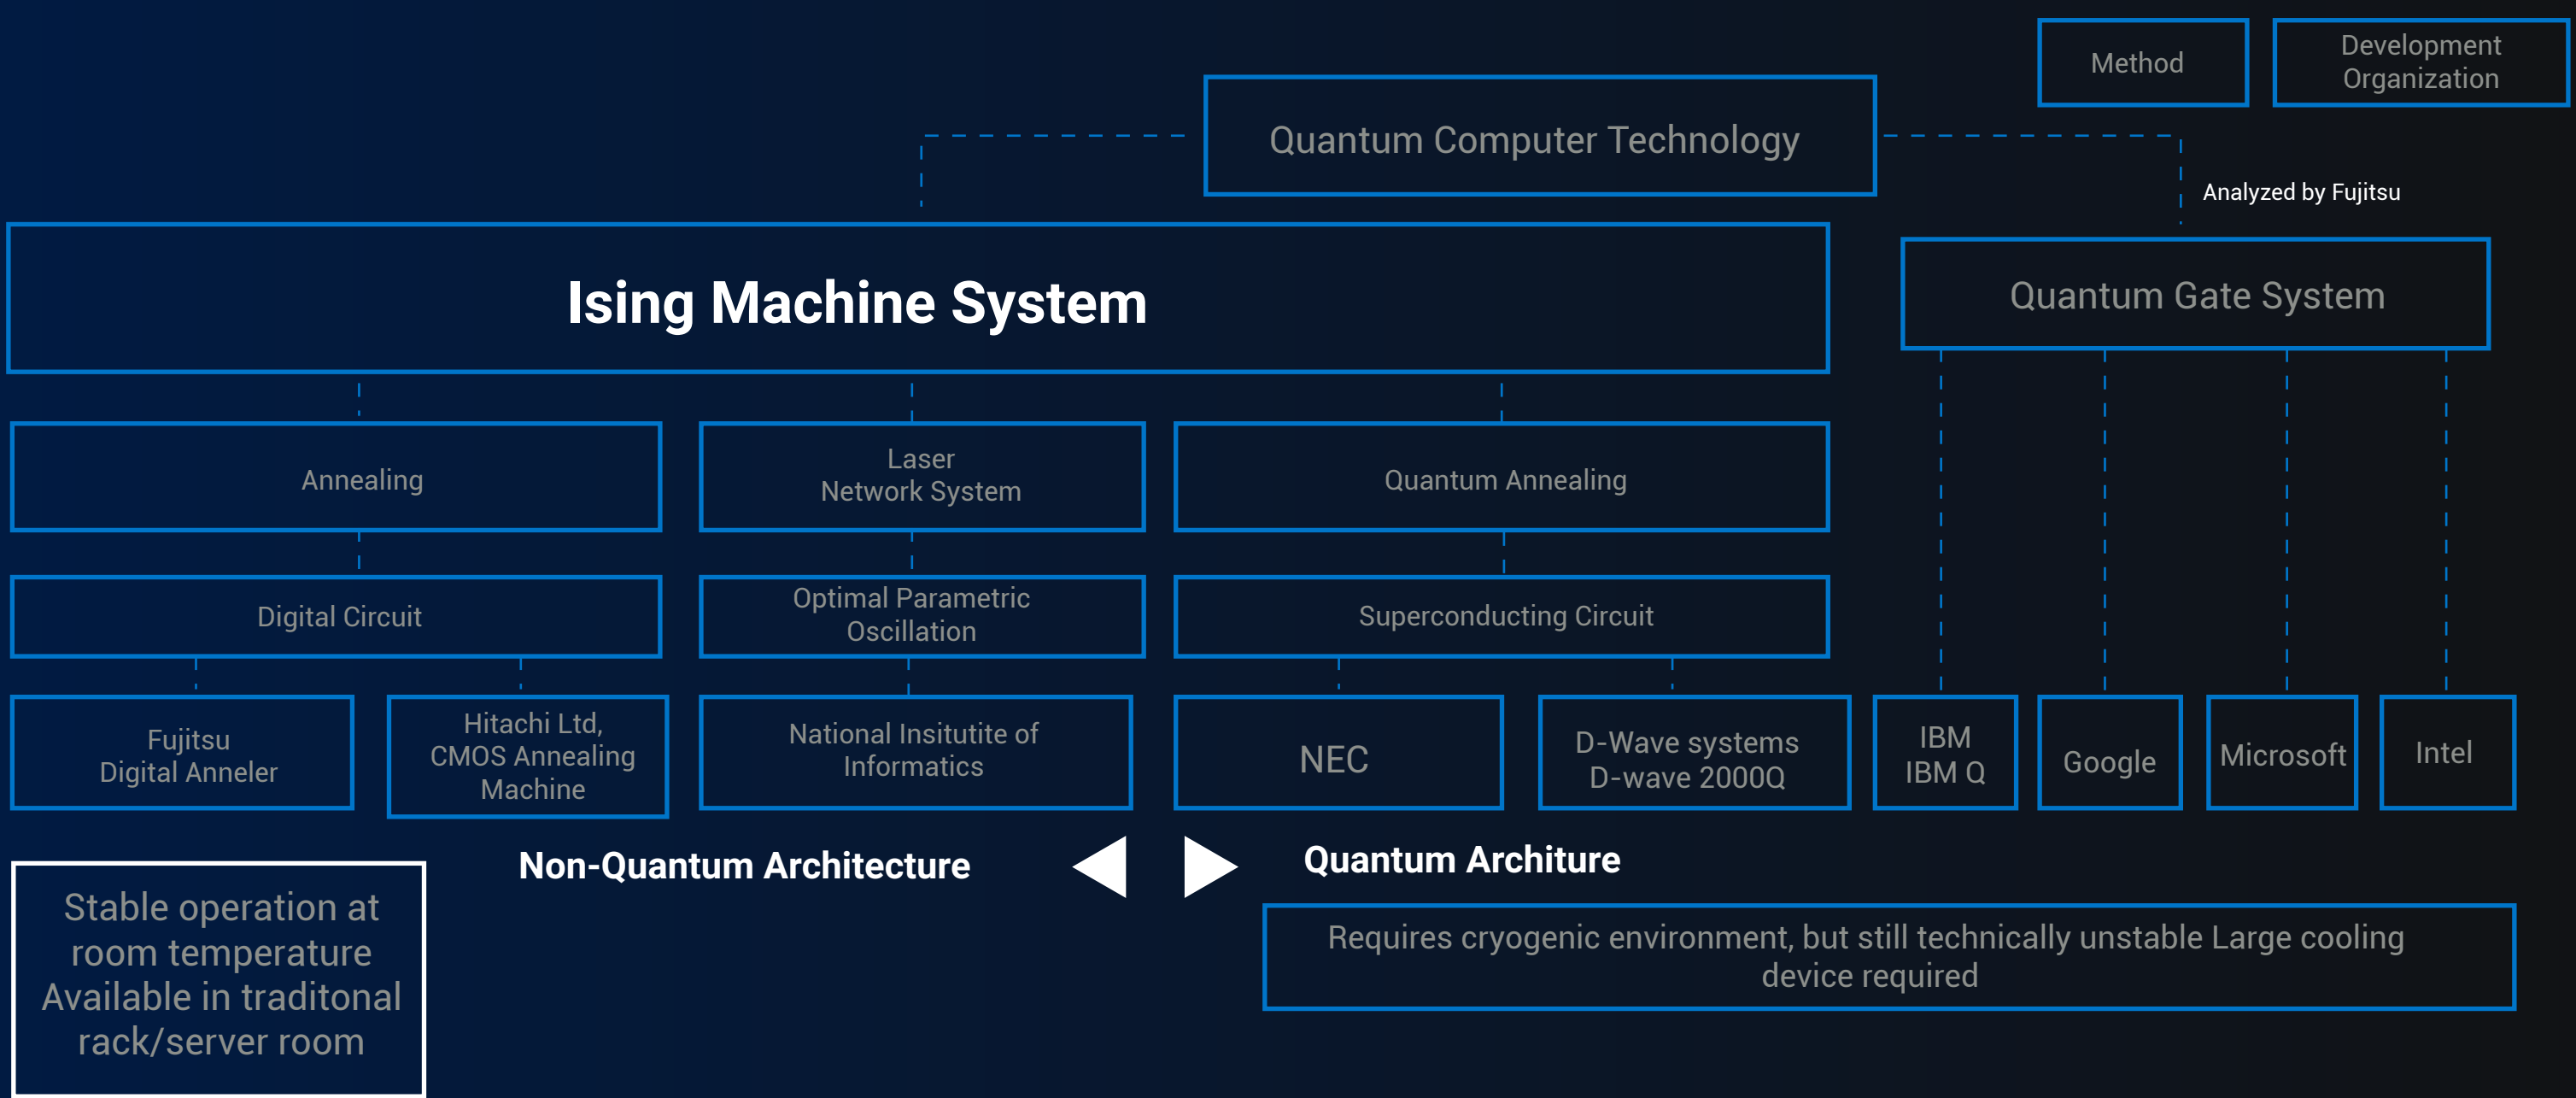

ZEROONE

WHAT IS THAT?

The definitive breakthrough comes from the application to Q-HATS of the “Digital Annealer”, a state-of-the-art chip from Fujitsu corp. Japan.

CFX Quantum, cooperating with a University research center, created a mathematical formula for The Digital Annealer to allow arbitrage trading in Cryptocurrencies and other assets.

The speed light calculations and transmission of orders creates a unique chance.

1%

Zero loss trading with 1% fixed monthly return.

HOW CAN THIS BE

POSSIBLE?

The same assets are bought and sold at same time on different markets, gaining small percentages every time.

This technique is widely used by brokers and exchanges, but the speed of pre-quantum chip allows for unprecedented results.

A complete revolution that CFX Quantum will launch immediately after listing of CFXQ token.

Business Transformation

The calculus potential of the “Quantum Annealer” is so impressive that we will be able to spot “instant triangular trades” with virtually **ZERO RISK**, adding up small profits every day.
